

Systems Analysts and Software Engineers for Insurance Broking and Product Configuration Platform

Based in the City of London and within their Services Delivery team, Total Objects is looking to expand their Software and Product Development team with innovative and dynamic System Analysts and Software Engineers. The roles are responsible for creating and developing high end, enterprise wide solution for Insurance Broking and to work closely with Total Objects clients to configure and launch products rapidly in the market. The roles require proven software design and/or software development experience in a demanding and dynamic environment coupled with a keen appreciation of the precision required to deliver quality software solution in the financial sector. Candidates must prove prior experience of their creativity and attention to detail in their software design and /or software development projects to date. Graduates who can show excellent software design and development skills acquired during their education or internship will also be considered.

Key Requirements:

- Capacity to take full ownership and accountability for all aspects of project execution
- Proven track record of Business and System Analysis and/ or software development skills of technology solutions in the high-value financial community
- Outstanding written and verbal communication skills with an ability to communicate confidently and concisely
 - Committed individual that thrives on a challenge
- Experienced in software design and/or development projects involving 'product' software in the Financial sector
- Creative and technical skills with exceptional attention to detail; software engineers would need at least 2 years experience in the following technology:
.NET, C#, VB.NET<http://VB.NET>, PHP, MySQL, Mongo, SQL, Microsoft Reporting Services

About Total Objects

Total Objects was formed in November 1999 and since its inception has been successful in delivering business solutions to a range of insurance brokers and underwriters to become one of the most recognised solutions providers in the Insurance marketplace. We are enjoying a period of sustained growth and are now actively recruiting people across the business to help us deliver to our existing customer base and grow it still further.

In addition to our successful and acclaimed broking products line (GLOBAL XB) Total Objects also provide the MGA and MGU markets with a web based Broking solution for high volume business. One of our unique selling points is providing our clients with solutions that allow them to launch insurance products rapidly into the market. More recently, Total Objects acquired a leading edged Insurance Services Claims processing solution (Claims Desk) and have been successful in implementing the solution at a major Insurance services provider.
